

THE COMMERCE OPERATING SYSTEM

Shopify built for the way MENA actually sells.

Markium turns any merchant — from an Instagram seller to a growing brand — into a real online business in minutes: **storefront**, **orders**, **cash-on-delivery** & **local delivery**, in one platform. COD-native, Arabic-first, and priced so merchants start at zero.

THE PROBLEM

- DMs & sheets** Orders taken by hand in Instagram & Facebook messages — no store, no system.
- COD chaos** Cash-on-delivery confirmations, returns & hand-offs leak revenue.
- Tools misfit** Shopify & co. assume cards, USD & English — not COD or Arabic buyers.

THE SOLUTION — ONE PLATFORM

- **Instant storefront** on Cloudflare's edge — live in minutes
- **Orders & inventory** — one dashboard for every channel
- **COD + delivery** — confirmation flow & local partners
- **Marketing & analytics** — turn social audiences into buyers
- **Web · mobile · admin** — one connected system
